

Assignment no 9

Setting Up a Laravel Project — Step by Step

1. Navigate to the XAMPP Directory Open Command Prompt and switch your working directory to the XAMPP htdocs folder using the path below:

```
C:\xampp\htdocs
```

2. Create a New Laravel Project Once inside the directory, execute the following command to set up a fresh Laravel project named durgesh

```
laravel new durgesh
```

3. Configure Installation Settings As the installation runs, choose the following options when prompted. Select **None** for the Starter Kit and **0** for the Testing Framework. Choose **No** for AI-assisted coding and set the database to **MySQL**. When asked about default database migration, select **Yes**, and also select **Yes** for ignoring scripts.

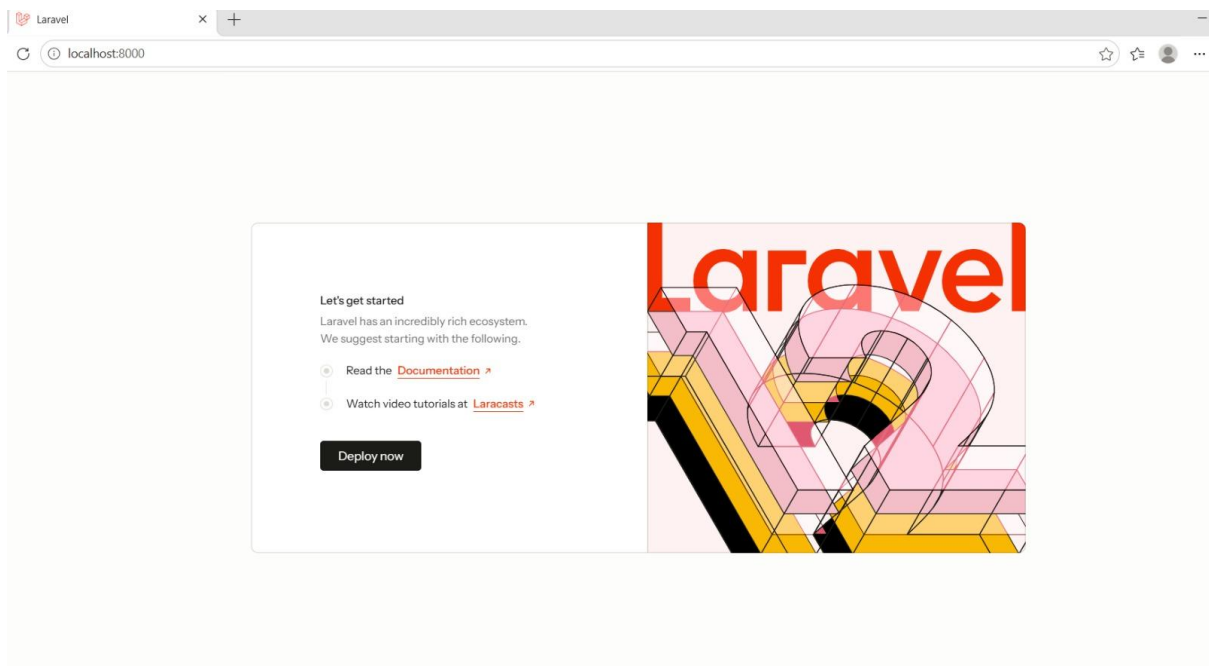

4. Start the Development Server After the project is successfully created, enter the project folder and launch the local server with the commands below:

```
cd durgesh
```

```
composer run dev
```

5. Open in Browser Finally, open your preferred browser and enter the following URL to verify that your Laravel application is up and running:

<http://localhost:8000>

Creating a View and Defining a Route in Laravel

1. Create the View File Open your terminal and run the command below to generate a new view file named **home**:

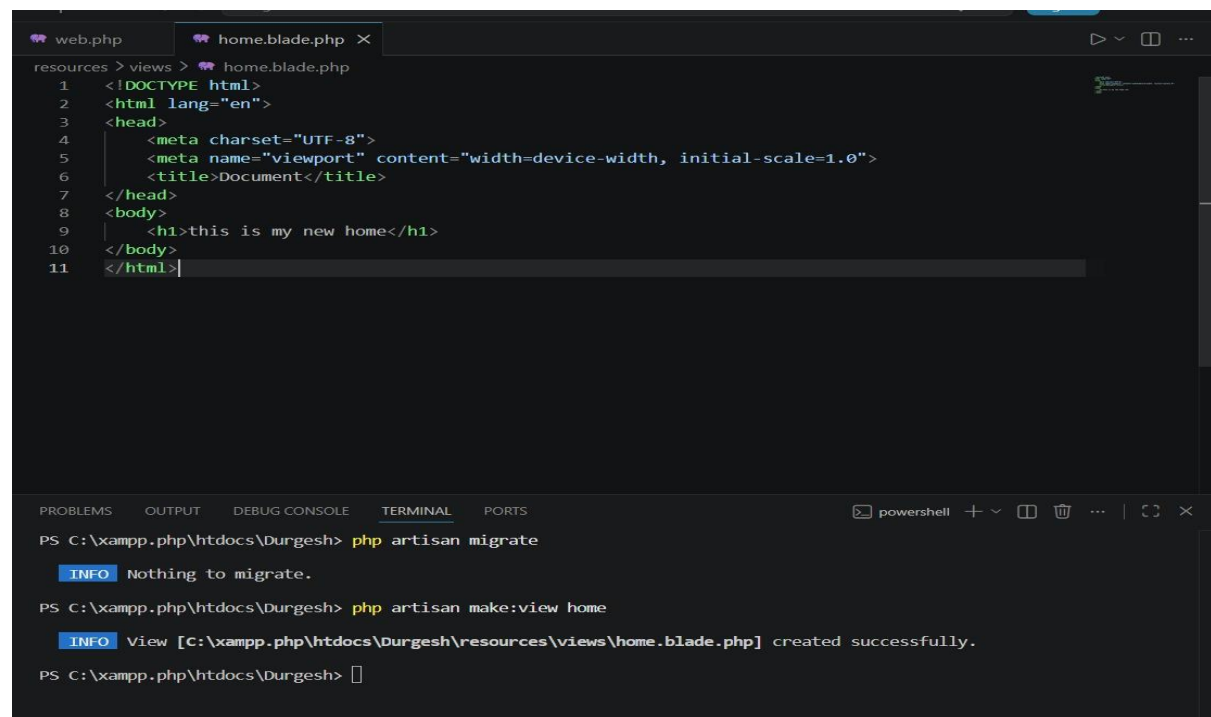

```
php artisan make:view home
```

2. Define the Route Navigate to the web.php file and add a route for the home page. This allows Laravel to correctly recognize and handle any incoming requests made to that URL.

3. Edit the Blade Template Open the home.blade.php file and write the necessary HTML content inside it. This will form the basic structure and layout of your home page.

4. Save and Preview in Browser Once all the changes have been saved, launch your browser and enter the URL below to see your home page live:

<http://localhost:8000/home>

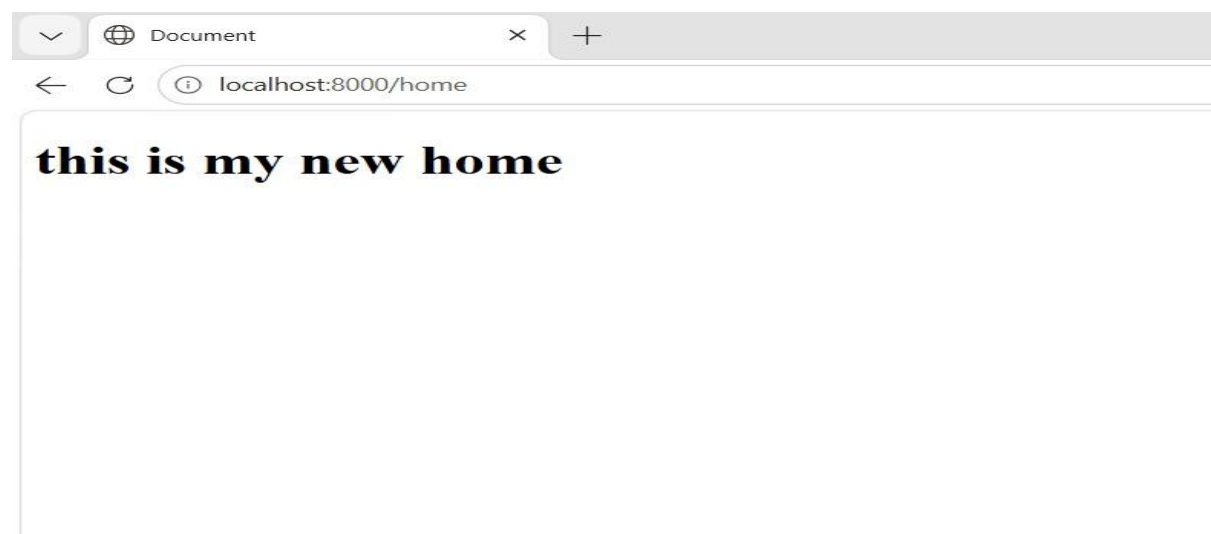

The screenshot shows a code editor with two tabs: 'web.php' and 'home.blade.php'. The 'home.blade.php' file is open, displaying the following HTML content:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Document</title>
7 </head>
8 <body>
9   <h1>this is my new home</h1>
10 </body>
11 </html>
```

Below the code editor is a terminal window with the following output:

```
PS C:\xampp.php\htdocs\Durgesh> php artisan migrate
INFO Nothing to migrate.
PS C:\xampp.php\htdocs\Durgesh> php artisan make:view home
INFO View [C:\xampp.php\htdocs\Durgesh\resources\views\home.blade.php] created successfully.
PS C:\xampp.php\htdocs\Durgesh>
```

1. Create the View File Open your terminal and run the command below to generate a new view file named **about**:

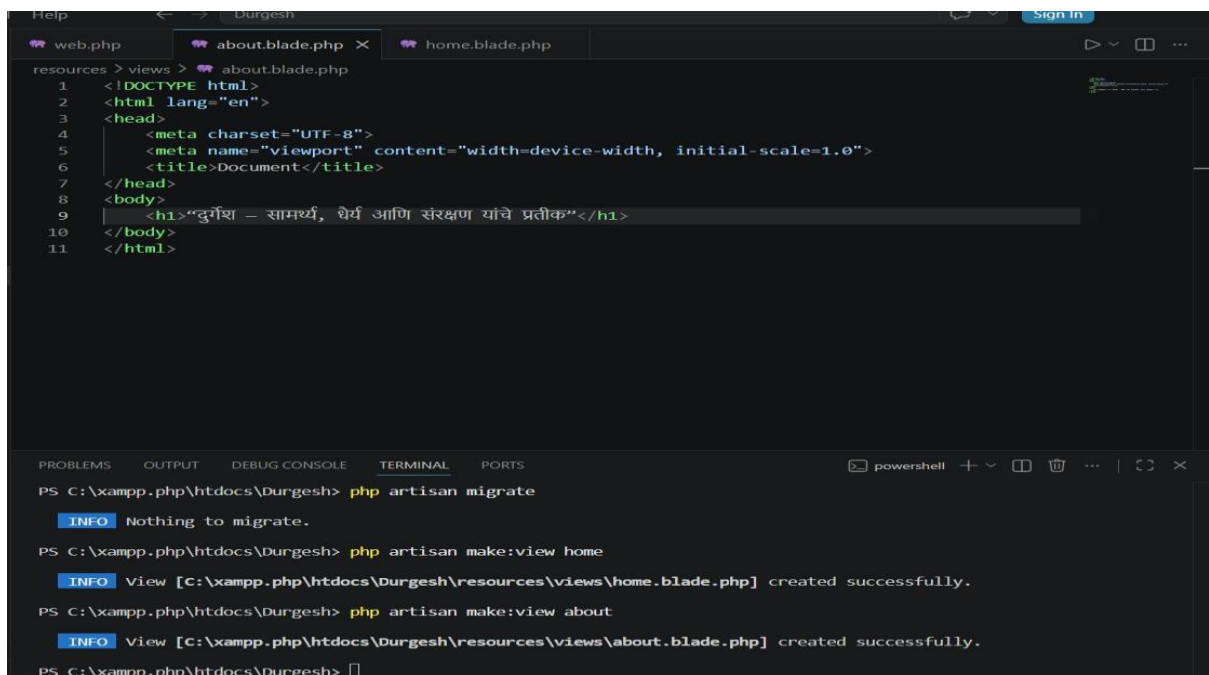

```
php artisan make:view about
```

2. Define the Route Navigate to the web.php file and add a route for the about page. This allows Laravel to correctly recognize and handle any incoming requests made to that URL.

3. Edit the Blade Template Open the about.blade.php file and write the necessary HTML content inside it. This will form the basic structure and layout of your about page.

4. Save and Preview in Browser Once all the changes have been saved, launch your browser and enter the URL below to see your about page live:

<http://localhost:8000/about>

The screenshot shows the VS Code editor with the `about.blade.php` file open. The file contains the following HTML code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Document</title>
7 </head>
8 <body>
9   <h1>“दुर्गेश — सामर्थ्य, धैर्य आणि संरक्षण यांचे प्रतीक”</h1>
10 </body>
11 </html>
```

The terminal window at the bottom shows the following commands and output:

```
PS C:\xampp.php\htdocs\Durgesh> php artisan migrate
INFO: Nothing to migrate.

PS C:\xampp.php\htdocs\Durgesh> php artisan make:view home
INFO: View [C:\xampp.php\htdocs\Durgesh\resources\views\home.blade.php] created successfully.

PS C:\xampp.php\htdocs\Durgesh> php artisan make:view about
INFO: View [C:\xampp.php\htdocs\Durgesh\resources\views\about.blade.php] created successfully.

PS C:\xampp.php\htdocs\Durgesh>
```
